

Smart Antenna Selector L

The best solution for TV domes switching

The Smarter way to select your Antenna

- The **Smart Antenna Selector Light** allows to select the TV antenna according with the customer needs
- Automatically select the best signal from the two satellite domes.
- Based on Crestron series 3 processor, the system reads signal level, azimuth position and tracking status from the antenna BDE
- Manual and automatic modes are selectable from front panel and/or intuitive GUI
- Compatible with KVH HD11, HD7, TV8, TV6 and TV5 antennas

Smart Mode, Manual Mode

- **Smart mode** routes the best signal to both satellite receivers distributions, automatically or manually. The antennas must track the same satellite.
- **Manual mode** The customer can select the antenna manually just pressing A or B
